PROFILE

Junior Data Analyst with a strong foundation in data analysis and data-driven problem-solving. Skilled in data cleaning, data visualization, and transforming raw data into actionable insights to support business decisions. Proficient in tools such as Excel, Power BI, SQL, and Python (Pandas, NumPy), with hands-on experience in data analysis workflows and fundamental statistical techniques. Passionate about continuous learning and improving analytical skills to deliver accurate and impactful results. A detail-oriented and motivated individual, eager to apply knowledge to real-world projects, collaborate with teams, and contribute to data-driven decision-making.

WORK EXPERIENCE

Freelance AI / Machine Learning Engineer, Freelancer platforms	06/2023 Remotely
I work independently in AI and machine learning, focusing on designing, training, and deploying predictive and classification models. I conduct data analysis and provide machine learning solutions. By utilizing Python and frameworks such as TensorFlow and PyTorch, I collaborate with a diverse range of clients to improve model performance, fine-tune these models, and deploy practical, scalable applications.	
Freelancing Coach, Elharefa, DEPI	02/2024 Remotely
I conducted training and orientation sessions for students on the concept of freelancing and how to start their careers in this field. I provided guidance, shared best practices, and offered tips for success. Additionally, I explained freelancing platforms that specialize in Data Science and Machine Learning, including how to register and work effectively on these platforms.
